I am a dedicated third-year Bachelor's student at Herald College Kathmandu with a strong commitment to learning and academic success. Originally from Nepal, I bring a positive, friendly attitude and enjoy working collaboratively with others. I actively participate in college activities and aim to make a meaningful impact in both my academic journey and the wider community.

- UI/UX Design
- Design System
- User journey and UI flowchart design
- Backend Web Development with Django
- Design QA, Easily Adaptable, User Research
- Open-Minded Team Player
- Good Time Management, Communication & Interpersonal Skills
- Continuous Learning, Problem Solving, Responsive Design

PROJECTS

- **Mobile Banking App UI Design(SKY BANK)**

Designed a modern and user-friendly mobile banking interface focused on usability and security. Created wireframes, high-fidelity mockups, and a responsive layout using Figma. The design included core features like account summary, transaction history, fund transfers, and biometric login.

- **Library Management System (Django + Python)**

Developed a web-based library management system to streamline book inventory, user registration, and borrowing processes. Built using Django framework with a clean admin interface and secure user authentication.
